Subject: FW: Support for San Francisco compost giveaway program
Attachments: NEBRA_SFPUC-BiosolidsCompostSupport-Feb10.doc

I have suggested that they address this to the Mayor, not me. Take a peek and see if you have any other suggested changes.

Natalie:

Attached is a draft of the letter, which is still under review by the NEBRA Board (so it may change some). This is to give you a sense of what we thought would be helpful. It can be addressed to anyone you think makes sense. If you think it should take a different approach or whatever, just let me know.

Thanks,

Ned

Ned,

This would be great. Let me chat with our communications director to see what he thinks. My sense is that you would address it to the mayor, cc'ing our GM and our AGM for Wastewater. But let me check. They are planning a protest on SF City Hall this Thursday, so stay tuned.

Thanks,

7/9/2010

Natalie

Natalie:

I don't know if it will help now, but the NEBRA Board of Directors has agreed to submit a letter of support for the SF compost giveaway program to you and/or the mayor's office or whomever. Our Board recognizes that organized opposition to biosolids compost use there in California represents a threat to some fine biosolids composting programs (and other biosolids recycling programs) here in this region. (In addition, we feel a bit guilty and responsible for having one of the lead organizations working in opposition to biosolids based in our region: RILES of Boston ;)

Please let me know to whom it would be best to address this letter of support and to whom it should be copied.

If you would like to discuss details by phone, feel free to call.

Thank you,

Ned
